Sagar, Karnataka - Google Maps

MY LAKE

- This lake is known as old gange lake.
- It had formed during the time of Keladi dynasty's rule.
- This was formed naturally, but mud at the sides was removed so that water should not get mixed with mud.

AROUND MY LAKE

- There are many trees of various varieties surrounding the lake.

- A road connecting many villages passes in front of it.

AROUND MY LAKE . . .

*It is surrounded by
forest on one side*

*And on one side
agricultural land is
found*

Channel flowing to pond

SPECIAL FISHES

Colour fishes

ABOUT THE SPECIAL FISHES

They should be
protected.

These colourful fishes
are at the edge of
extinction.

USES OF THIS LAKE

- The main special feature of this lake is that it is filled with water althrough the year .
- This lake water is mainly used for agriculture purpose.
- It has provided water to 3-4 surrounding villages.
- It has filled many wells with water.

MY CONCLUSION

- Nowadays due to awareness of water resource by many organisations, management of water in malnad region is in good condition.
- Government should clean these lake atleast every year.
- Government alone cannot do everything so co-operation of peoples of is very essential.

NATURE HAS GIVEN
EVERYTHING TO MANKIND
BUT IT EXPECTS ONLY A
SINGLE THING THAT IS ITS
PROTECTION.

THANK YOU
