1. There is Actually No Water Crisis

T V Ramachandra, co-coordinator EWRG-CES, IISc Bangalore, said, there is actually no water crisis in Bengaluru, but the problem is in its water management.

"In reality, Bengaluru receives 740 to 850 mm rainfall annually. If we quantify this water it makes 15 TMC of water, whereas Bengaluru requires 18 TMC of water. That means 70% of water required for the city is available here itself. So, there is no need to divert either Sharavathi, nor Netravathy or Yettinahole in the name of water scarcity in Bengaluru," he said addressing the gathering
