Synopsis

What if cities made life better for the people who live and work there? What if healthier life for all were a given? – not someday, but today? Answering the world's social and environmental needs is possible. But it can only happen when businesses like yours are committed to innovating for the greater good.

India is witnessing exponential growth in the [renewable energy](#) sector, helping it effectively overcome the pressing challenges of growing energy demand and alarming growth in air pollution levels. As a committed partner to the Government of India, Hitachi is harnessing its [green energy](#) solutions, to augment India's clean

energy capabilities. Through its intelligent solar inverters and collaborative partnership in delivering mega hydropower projects, Hitachi is ensuring that millions of people get access to clean, affordable electricity that improves their Quality of Life.

Explore how India is ramping up its renewable energy c:
Hitachi is contributing to the [green energy revolution](#) t bon,
sustainable society.
