Experts to study effects of radiation near Kaiga

Staff Correspondent

A team of experts from the Tata Memorial Centre, Mumbai, has commenced a study on the health problems of people residing within a 15-km radius of Kaiga Nuclear Power Plant, chairman of Western Ghats Task Force Anant Hegde Ashisar said.

A study conducted by the task force last year revealed that the people in the vicinity were suffering from health problems.

The task force recommended the State government to conduct a scientific study on the effects of radiation from the nuclear plant on the health of the people.
