

Birds of Girinagara

-Meghavarna

Objectives

- To document birds found in the area.
- To analyse the condition in the area

Material Used

- DSLR Camera with 300mm lens
- Digital Camera
- Binoculars

Study area

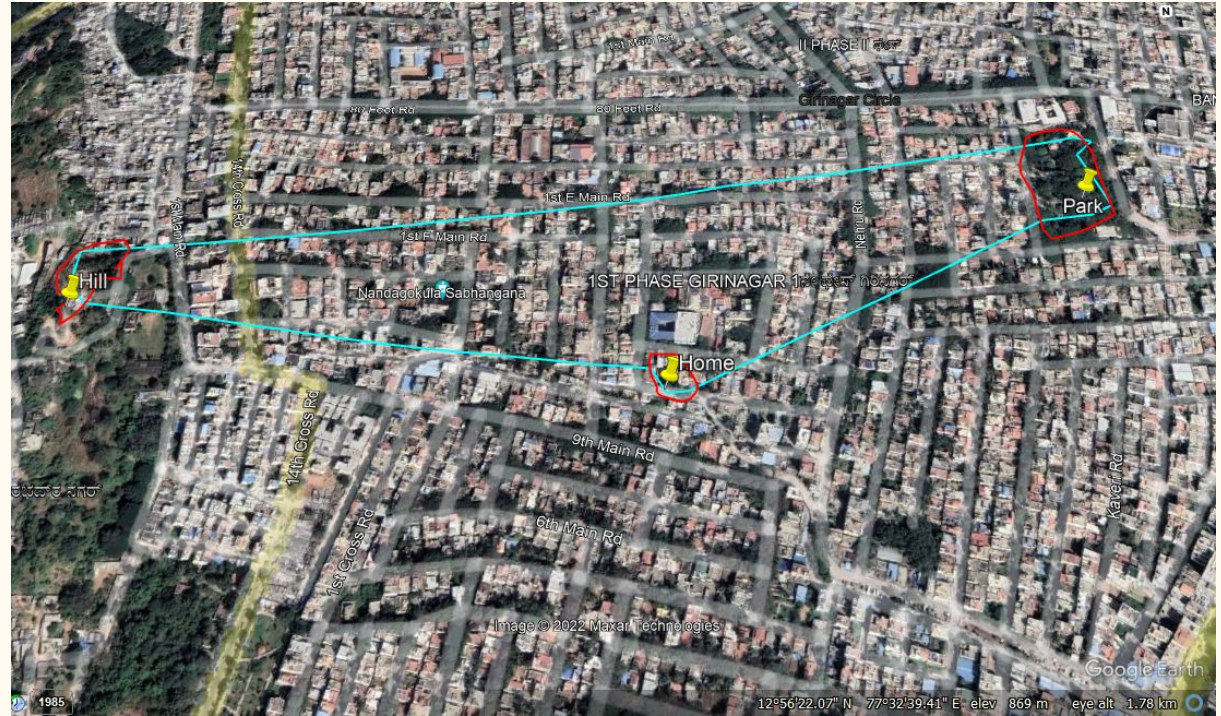

Latitude: $12^{\circ}56'25.28''\text{N}$

Longitude: $77^{\circ}32'31.07''\text{E}$

Area-Home: 0.45 acre

Park: 2.40 acre

Hill: 0.90 acre

Common name	Scientific name	IUCN Status	Resident/ Migratory	Activity	Observation
Pale Billed Flowerpecker	<i>Dicaeum erythrorhynchos</i>	Least concern	Migratory Long distance	Moving from tree to tree	
Common Tailorbird	<i>Orthotomus sutorius</i>	Least Concern	Resident	Feeding on insects	Hunts for insects on ground, tree and flying
Cinereous Tit	<i>Parus cinereus</i>	Least concern	Resident	Perching	
Purple Rumped Sunbird	<i>Leptocoma zeylonica</i>	Least concern	Resident	Feeding on nectar	Very active
Red Whiskered Bulbul	<i>Pycnonotus jocosus</i>	Least concern	Resident	Singing a song	In trees it moves to the branch above by a jumps and a flutter of its wings.

Common name	Scientific name	IUCN Status	Resident/ Migratory	Activity	Observation
White Cheeked Barbet	<i>Megalaima viridis</i>	Least Concern	Resident	Feeding on Insects	Pecks the the husk of seeds while holding them with their legs to eat the inside.
Rose ringed Parakeet	<i>Psittacula krameri</i>	Least Concern	Resident	Feeding on Fruits	In fruits like mango,often only leaves the seed hanging on the tree.
Common Myna	<i>Acridotheres tristis</i>	Least Concern	Resident	Perching	
House Crow	<i>Corvus splendens</i>	Least Concern	Resident	Perching	

Common name	Scientific name	IUCN Status	Resident/ Migratory	Activity	Observation
Large Billed Crow	<i>Corvus macrorhynchos</i>	Least Concern	Resident	Feeding on rat	Fights with kites for food
Rock Pigeon	<i>Columba livia</i>	Least Concern	Resident	Feeding on Fruits	It is a ground feeder
Eurasian Sparrowhawk	<i>Accipiter nisus</i>	Least Concern	Resident	Watching its prey	
Black Kite	<i>Milvus migrans</i>	Least Concern	Resident	Perching

Common Myna

Rose Ringed Parakeet

Eurasian Sparrowhawk

Conclusion

- Birds of prey may watch both while gliding and while sitting.
- Every bird is unique, Sunbird does not sit on the same plant barbet sits.
- Small birds usually are insectivorous and comparatively more active than larger birds
